

# Lantern House

**You will need: Torchlight lantern kit, Garden cutters, PVA glue, Plastic sheet, Sponge, Plain white paper.**

## Step 1

Build the basic shape of your house. Using masking tape to attach the willow together. Start with a square box.

Add a cross on the bottom for support and then add the roof.

## Step 2

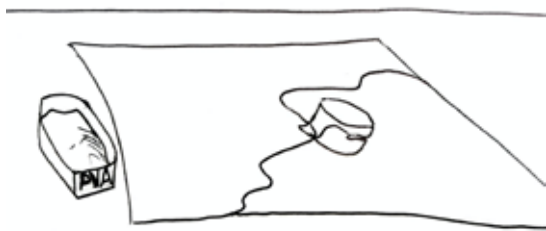

Add any extra details using spare bits of willow

(if you want to bend the willow you will need to soak it over night in water)

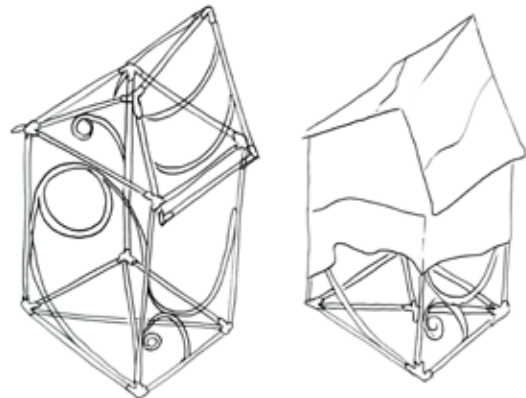

## Step 3

Cover a table in a plastic sheet and lay the tissue on it 1 sheet at a time. Mix your PVA 50/50 with water and paste the tissue using a sponge.

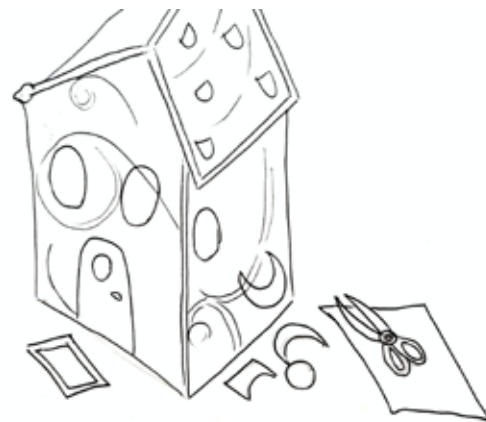

## Step 4

Carefully stretch the tissue paper over the lantern to cover the whole shape except the bottom. And leave to dry.

## Step 5

Decorate your lantern with shapes cut out from plain white paper. Paste the on and then add a second layer of tissue over the top.

**Your lantern is ready to go! Drop it in to us at Ragtag Community Scrapstore or at the Torchlight Information Stand.**
